

# Forms & Assessments

## On demand e-forms and assessments

The Medworxx Forms & Assessments module is an easy-to-use solution to create customized electronic forms and assessments. Hospitals use these forms and assessments to improve patient flow in areas such as high risk discharge planning, performance measurement and improvement, and clinical workflow management. Medworxx enables integration of key assessments and forms into the care delivery process in support of smoother transitions between levels of care and improved patient safety throughout the patient journey.

### The Value of Medworxx Forms & Assessments

Medworxx Forms & Assessments are specifically tailored to meet rapidly changing reporting needs and processes.

- Timely and accurate data collection
- Robust Data Analytics
- Seamless integration with workflow and processes
- Concurrent tracking of data; visibility into reports
- Produces highly-focused reports with graphical displays
- Captures data and/or clinical evaluations – allows for historical analysis and trending
- Ideal for time-limited, episodic and unique-demand reporting needs
- Full ad hoc reporting on a wide variety of patient-centric data
- Incorporates selected data from multiple hospital information technology sources
- Upholds privacy and security through comprehensive analysis features
- User-configurable platform allows a simple build/conduct/report process for independent forms

**Medworxx Forms & Assessments will allow your organization to turn paper-based processes into simple web-based data capture.**

## Integrate with the Medworxx Patient Flow Platform

Implement Medworxx Forms & Assessments as a stand-alone application or in conjunction with Medworxx Clinical Criteria and Medworxx Bed Management. Clients of Medworxx Clinical Criteria leverage 'every patient/every day' assessment activity with a framework to support new reporting topics, on demand. Your Medworxx Technical Team is available to support best practice integration using existing Medworxx Forms & Assessments.

### Configure every data field

With the Forms and Assessments module you can customize every field to suit the data collection needs of your region, hospital or unit.

Alternate Level of Care form

High risk for discharge/readmission assessment

Forms & Assessments is one-of-three modules in the Medworxx Patient Flow Platform that also includes Medworxx Clinical Criteria and Medworxx Bed Management.
